This letter is in response to the request for additional information received by Friends of Frank Wolf in July 2012 regarding the April Quarterly 2012 amended report.

As noted in the FEC letter, our amended April Quarterly 2012 report showed additional receipts not included in the original report. During the time period that we were preparing the report, our FEC compliance software provider was having difficulty with their servers due to volume/internet traffic leading up to the report due date. This made it very difficult for us as we attempted to input information into our database through the online system that we use for preparing reports. Our software provider did notify us of the problem (through e-mails to costumers) and they worked to fix the problem over the course of several days. However, during this time period, some information that we thought had been posted to our database was not received and we then worked to determine which receipts were missing. We filed the amended report to reflect the correct information for the reporting period.

Please do not hesitate to contact us if you require further information.
